Subject: RE: Laptop case

As we are coming towards the end of the year, I do not want to impose too much burden on the company, this laptop is fine and has been functioning very well so far especially in Wickliffe, Cleveland, I don't mind keep using it and in case someone else may share using it I don't mind as well.

Since I have lots of software already loaded in, with remote access to Wickliffe, It would save us from having to reload and avoid complications like Machine Id and soft key licenses as ABB make a living on selling licenses that cost us a lot.

We also have to agree on a computer for us to use as we are also issued with Rainbow hardware keys that are attached to the serial port and will have to register the computer giving them the so called Machine ID with ABB eventually so that we can work away independently and not to always work remotely. Some software packages are licensed on a per machine basis.

The only other thing I've noticed is the case. It is not of the right fit, and the zip wills eventually pre maturely wears off. It would need one about one inch wider. Can I swap it with one slightly larger? The height is fine.

Thanks for your kind consideration.

Regards,

H

Subject: RE: Laptop case

We can work on a case, quick question do you like the laptop you currently have?

If so would you just like to keep that one and we can just order another one that would just go into our pool here in the IT department.

Thanks

Joe

I was not too sure whether the laptop would come with a protective case.

Can you please inquire otherwise we'll need a suitably sized one. What do you think?

Thanks,

Subject: RE: Loaner laptop status - Needs to keep it for awhile longer

Thanks,

I fully understand. I shall ask John for trying to make one available on a longer term basis. Although 5 of us have been granted authorization by ABB the supplier of the system, only my laptop is fully functional.

Thanks,

Subject: RE: Loaner laptop status - Needs to keep it for awhile longer

We can let you go for another couple of weeks, but not much more than that.

By definition this is a loner laptop signed out by individuals for short durations usually when they are out of town on business trips.

Anything long term needs to be addressed and a permanent solution put in place.

We only have a few of these loner laptops available and don't want to be caught short if another request for one comes up.

Thanks

Joe

I will get with Joe Sachen and see what he thinks. I am guessing it wont be a big deal. I will get the answers and then contact you.

Dan,

Was discussing this with Tony and Chris on my return.

Since I had so much software installed on it, they including John Frick recommended me to ask you for an extension.

We have software installed on the laptop with authorized footprints certificates for remote monitoring of the installations in Wicliffe, Cleveland, Ohio and was able to come back earlier so as to reduce accomodation expenses.

Subject: Infected LAPTOP

Good morning,

What is the status of the Laptop?

We'll need it here in order to remote with ABB Wickliffe Ohio in order to feed them back our input for the design.

Please note that to run the ABB Composer software, one would need the hardware parallel port dongle for the identification of the registered machine.

Thanks,

Dennis Tillery

FYI. Obviously the software on the laptop is not too critical, if [REDACTED] can use a temporary replacement.

I have copied some previous correspondence for your review.

Robin,
Whilst the laptop allocated to me is being de-wormed, I'm wondering whether it would be advisable to get a temporary replacement.

Good afternoon Sam,
As I have to make some firm commitments on housing, can you please advise me where I stand
for long term commitments? Otherwise it would be costly to break any contract.
Kindest regards,
[REDACTED]

Talked to Robin and was told that it's none of my business when the laptop will be given
back to him.

Strange!...Does this surprise you?

7:53am - Tony Johnson (helpdesk) re-assigned ticket to Server Team:

2 - 1/19/2010 7:53:34 AM - Michael "Tony" Johnson (Tony Johnson) - Assign

Reassigned to Network Server

8:15am - Jeremy Riley re-assigned ticket back to helpdesk to clean viruses:

3 - 1/19/2010 8:15:29 AM - Jeremy Riley (Jeremy Riley) - Assign

laptop has possible spyware/virus infection please clean.

9:00am - I examined the laptop and found Microsoft Essentials Anti-Virus was installed and it did detect some viruses. I located a virus manually on the laptop, but did not remove. I exported the Temporary Internet Files and History index.dat (Microsoft data file that contains list of sites accessed by time and date) to investigate what had sequence of events had taken place and discovered that all history had been wiped a 2 weeks prior (a week before I received the laptop). I exported the results of the index.dat files and reviewed the Recent Documents to help assist with the investigation. I noticed several instances of personal use of the laptop and exported the results into a file for later review and also took some screen shots. I did notice that a usb flash drive had also been used regularly in the laptop and verified the same files were accessed on the laptop as well as Henry's workstation on the Corp network (BPU is really lucky a virus outbreak has not occurred). I noticed the date had been advanced by a month at one time, as some file date stamps were a month ahead. I contacted Dennis Tillery at this point.
